You will find on this page the answers to your most frequently asked questions about our range of carbon 60 oils.

Why do you use vegetable oil instead of water for C60 preparations ?

The carbon 60 molecule or fullerene is not soluble in water, it does not mix with water. By mixing it with a vegetable oil, we make sure that the C60 molecule goes into the liver, which treats the oils. The liver will then distribute the C60 throughout the body via the blood system.

Why take C60 oil in the morning on an empty stomach ?

According to Chinese medicine, verified by modern medicine, the liver functions optimally between 5am and 8am. The liver will therefore quickly treat the vegetable oil and the carbon 60 it contains more effectively.

Where does olive oil come from for the C60 preparation ?

Our supplier is an olive grower from our city, Salon de Provence. He owns his own mill, so he masters his entire manufacturing process. With only 1400 trees, he strives to perpetuate ancestral knowledge. It offers 5 different oils, from the sweetest to the most ardent, 17 medalists since 2005. It uses authorized products in organic farming. This is the guarantee for you of a product of excellence. We use a sweet oil, very spicy, which retains its typical Provencal character, obtained with a traditional variety of the Alpilles massif. Fine and round, it displays lively and fresh aromas of grapefruit and tomato.

Why do you have to protect C60 oil from light ?

As with most vegetable oils, sunlight degrades the polyunsaturated fatty acids in the oil.

What is the shelf life of C60 oil ?

Vegetable oil suppliers indicate a shelf life of one year. Our olive oil supplier indicates a shelf life of 3 years. Indeed olive oil contains large amounts of vitamin E, which is a natural antioxidant. As a precaution, we indicate a maximum use period of one year.

Do you have several capacities available ?

You can find on our sale website bottles of 4.23 oz (125 ml) and 8.45 oz (250ml).

How long does a bottle of 8.45oz (250ml) last ?

At a rate of one teaspoon a day (0.16 oz - 5ml), you can use your bottle for 50 days, almost 2 months!

If you take a big tablespoon a day (0.5oz - 15ml), you will have enough C60 oil for about 20 days.

For how long can I take C60 oil ?

Scientific studies indicate no limitation of time for taking C60 oil. The longer you take C60, the more health benefices you get.

What is charging time ?

Charging time is the time that your body will take to reach its optimum state. It depends on many factors, such as diet, the amount of C60 oil you take every day. According to our own experience and of our customers, at a rate of one tablespoon per day, with a healthy and balanced diet, it takes about 3 months.
